PRESSURE VESSELS

300LT, 600LT, 1000LT, 2000LT

CONFORMITY

Detroit Air Pressure Vessels are utilised primarily for the storage of compressed air. Manufactured to two high standards, Detroit Air produces both CE and ASME certified pressure vessels, all of which conform to SANS 347 and PER.

QUALITY

Detroit Air carries affordable spare gauge kits and safety valves which can be used to effectively replace old or damaged units. Pressure vessels are powder coated in a high-quality corrosion resistant finish and are crated in fully enclosed wooden crates for safe transportation.
